

Our Person-Centered Philosophy

What "Person-Centered" Means to Us

We strive to empower our clients by encouraging them to make their own treatment decisions. Our qualified staff assist clients with developing treatment plans that focus on individual strengths, needs, abilities, and preferences. We respect client views and foster a collaborative treatment relationship that is based on respect and compassion.

Person-Centered Services

A variety of services are offered at ASCEND to ensure our clients receive appropriate and necessary care. Services include Diagnostic Biopsychosocial Assessments, Individual SUD and MH Counseling, Group Counseling, Behavioral Health Nursing Services, Peer Recovery Support, Case Management, Drug Screening, and Crisis Intervention. We focus on diversifying services based on the needs of individuals who struggle with Mental Health and Substance Use Disorders.

Your Feedback Matters

We value client, personnel, and community feedback. All stakeholders are encouraged to complete our anonymous Satisfaction Survey or utilize the Suggestion Box located in our lobby. Input gathered from these feedback mechanisms is used for quality improvement efforts. Your feedback matters at ASCEND!

Where Change Is Possible.
